

Ethan Hector

222816570 • Cape Town, Western Cape, South Africa • <https://www.linkedin.com/in/ethanhector>

SUMMARY

Final-year Applications Development student with strong foundations in Java, object-oriented programming, and full-stack development. Completed a 6-month AWS internship, gaining practical experience in building scalable cloud-native solutions and applying software design principles in real-world environments. Skilled in designing and developing applications using Java, React, and MySQL, with exposure to Agile methodologies and collaborative software delivery. Eager to contribute to a fast-paced engineering team by leveraging strong analytical thinking and a passion for building impactful solutions.

EXPERIENCE

*Amazon Web Services (AWS), **Cloud Support Associate (Intern)***

Feb 2025 - Aug 2025

- Collaborated with a team to design and prototype an internal AWS-specific GitHub-style application for the Cape Town office.
- The project focused on centralizing project repositories, improving discoverability, and encouraging collaboration across teams.
- Implemented using AWS services (Lambda, API Gateway, DynamoDB, Cognito, CloudFront), applying a serverless and event-driven architecture.
- Designed the front-end for repository browsing and search, integrated with AWS Cognito for authentication.
- The solution proposal was selected for potential implementation in 2026 to enhance internal developer workflows.
- Gained deep exposure to end-to-end application design, architecture decisions, and presenting solutions to technical stakeholders.

EDUCATION

Cape Peninsula University of Technology

Information Technology, Applications Development • Feb 2022 - Dec 2025

- Primary programming language: Java (used from first year onward for most core modules); additional languages like Python and SQL introduced through electives and Business Practice modules.
- Currently completing a Student Housing Connect project — a full-stack website developed using Java, React, and MySQL Workbench, applying OOP principles, database design, and business logic integration.
- Built strong foundations in software development theory and practice, including SOLID principles, testing, and algorithms.
- Delivered Power BI dashboards for Business Practice modules, combining financial data analysis with software applications.
- Designed and optimized relational databases using MySQL Workbench across multiple academic projects.

LICENSES & CERTIFICATIONS

AWS Certified Solutions Architect - Professional

AWS • Issued Aug 2025

AWS Certified Solutions Architect - Associate

AWS • Issued Jul 2025

Privacy by Design (Data Classification & Data Sharing)

LinkedIn Learning • Issued Mar 2023

Agile Foundations

LinkedIn Learning • Issued Aug 2023

Programming Foundations: Software Testing/QA

LinkedIn Learning • Issued Sep 2023

Software Design: Modeling with UML

LinkedIn Learning • Issued May 2023

Programming Foundations: Object-Oriented Design

LinkedIn Learning • Issued May 2023

Advanced SQL Project: Design and Manage a Database

LinkedIn Learning • Issued Mar 2025

SKILLS

Java • MySQL • Database Design • Software Design • Amazon Web Services (AWS) • Agile Development • Data Structures • Object-Oriented Programming (OOP) • React.js • Spring Boot
